

Financials

➔ With Infor FMS SunSystems v5 Financials, CFOs can make the right decision at the right time—every time.

Do business better.

Today's CFOs are under increasing pressure to act as strategic advisors and internal business consultants. In addition to handling their traditional responsibilities—the collection, measurement and analysis of data from the finance and accounting process—they are now required to:

- Keep up with the latest compliance requirements, technology, and working practices around the globe.
- Make sure their systems provide full transparency and control over all operations.
- Choose tools that drive down organizational costs while providing maximum ROI and the lowest total cost of ownership over the long run.
- Plan for the future at an appropriate rate.

Leverage experience.

The mounting challenges of the modern finance function inspired the design of Infor™ FMS SunSystems v5 Financials, and CFOs around the globe have responded by leveraging the 20 years of experience built in to this powerful solution. By combining the functions of general ledgers, budget ledgers, sales and purchase ledgers, project ledgers, cash books, and user-defined ledgers into a single, integrated ledger, this real-time transaction processing engine allows CFOs to immediately see the impact of any financial posting and get greater visibility into the business.

Get business specific.

Infor FMS SunSystems v5 Financials integrates general, payable, and receivable ledger functions into a single ledger. In addition, it provides fixed asset accounting and corporate allocations for rules-based redistribution of costs and other values, and is available in more than 20 languages. The solution includes an assortment of modules:

Accounting. Provides ledger accounting plus budget and commitment control through a single integrated ledger combining the attributes and functions of nominal, sales, and purchase ledgers; cash books; and analytical/project ledgers. Records up to four currencies per transaction—facilitating full international reporting and analysis—and allows definition of ten budget ledgers to reflect in-house requirements. In addition, offers up to ten analysis codes per entry plus the ability to subdivide them, providing sophisticated and virtually unlimited analytical capability. Also offers:

- Open periods to match the organization's posting and reporting requirements
- Dual base currency, providing full euro and GAAP support
- Reconciliation facility—e.g., for bank statements
- Online archive for completed transactions
- Sophisticated and flexible ledger inquiry function
- Automated calculation of payment terms—e.g., due dates
- Tax reporting, with up to 100 criteria available for selection
- Standard text for attachment to transaction types and data records
- Commitment and over-expenditure checking
- Definition of budgets for up to five analysis categories within a budget account
- Ability to restrict budgets to current period or provide multi-year budget control

Asset Register. Offers powerful reporting for increased control of fixed assets. Also provides:

- Flexible depreciation—up to ten methods per asset
- Asset notes system for tracking histories and lifecycles
- Multicurrency asset register

Corporate Allocations. Provides support for apportioned and fixed percentage allocations, fixed amounts, iterative charging, and inter-company processing. Also offers:

- High degree of flexibility to define allocation structures
- Posting options with tight controls
- Comprehensive audit trail to trace all allocations in full

See results now.

Infor FMS SunSystems v5 Financials is a highly functional and powerful financial management system that provides CFOs with exceptional analysis and reporting capabilities, helping them understand and manage the business like never before. Plus, the solution is designed for rapid, low-cost deployment, providing companies with fast ROI and low total cost of ownership in more than 20 languages.

About Infor.

Infor acquires and develops functionally rich software backed by thousands of domain experts and then makes it better through continuous innovation, faster implementation options, global enablement, and flexible buying options. In a few short years, Infor has become the third largest provider of business software. For additional information, visit www.infor.com.
