

Enterprise Reporting

➔ Infor PM Enterprising Reporting delivers reports securely to everyone in your organization who needs them, when they need them, and in the format they prefer.

Do business better.

Few in business today would argue with the saying, “If you can’t measure it, you can’t improve it.” But forward-thinking business leaders take this concept to the next level. They know that if you can’t effectively report on what you measure, you can’t make the timely and insightful business decisions essential to your long-term success.

Everyone in your organization—executives, managers and employees—needs timely visibility into your operations so the decisions they make and the actions they take support your strategic business objectives.

Leverage experience.

Infor™ PM Enterprising Reporting delivers reports securely to everyone in your organization who needs them, when they need them, and in the format they prefer. With Infor PM Enterprise Reporting, you’ll be able to bring all of your enterprise reporting requirements together with one solution that meets a wide variety of needs—from simple departmental reporting to complex enterprise reporting spanning multiple departments, divisions, country organizations, languages, and localizations.

Get business specific.

Infor PM Enterprise Reporting is easy-to-deploy over the Web, so your IT department won’t have to get involved in installing and managing client desktop software.

The solution features an intuitive user interface that can be personalized and customized to the individual needs of users. Because there are multiple levels of report interaction, all users—from novice to advanced—can easily access and work with the specific reports required to do their jobs. Infor PM Enterprise Reporting's major capabilities are:

Comprehensive reporting coverage. Infor PM Enterprise Reporting delivers a wide range of report types and formats, including ad hoc queries, managed reports, and business reports. The solution features multi-query compound reports, the ability to embed dynamic data, and access to heterogeneous data.

Simplified report creation and deployment. Infor PM Enterprise Reporting features drag-and-drop report data elements and formatting techniques that facilitate simplified report creation and deployment. Web-based adaptive report authoring enables users to generate reports quickly and easily. The solution features the ability to build reports once and deploy them globally with support for multiple languages, individual user control, and worldwide delivery of personalized reports.

Superior openness, flexibility, and scalability. Based on open Web standards, Infor PM Enterprise Reporting enables users to leverage their existing IT infrastructure and existing skill base, so cost of ownership is minimized. Easy integration, customization, and automation capabilities make it easy to use Infor PM Enterprise Reporting with your Web servers, portals, browsers, enterprise applications, platforms, and databases. High-performance, scalable reporting can accommodate thousands of users with enterprise-wide accessibility and 24X7 availability. In addition, the solution can be adapted easily for use with a wide range of security models.

Pre-built integration with other Infor solutions. Integrated with a broad range of Infor solutions, Infor PM Enterprise Reporting includes out-of-the-box integration and pre-defined business content that help you leverage the full value of your information assets.

Infor PM Enterprise Reporting integrates with other Infor systems and applications including:

- Infor ERP Baan 5.x
